CARDIAC DIAGNOSTIC CENTER - ECHOCARDIOGRAM REPORT

SAMPLE DATA - NOT REAL MEDICAL RECORD - SYNTHETIC DEMO ONLY

==========

PATIENT: Alice Walker (DEMO SYNTHETIC PATIENT)
RECORD CATEGORY: Cardiology (Transthoracic Echocardiogram)
FACILITY: City Memorial Hospital - Heart Institute
DATE: 2026-10-13 14:00 UTC

ECHOCARDIOGRAPHIC FINDINGS:

---

1. Left Ventricle (LV):
   - Normal cavity dimensions. LVEDD: 4.8 cm, LVESD: 3.1 cm.
   - Normal wall thickness. Interventricular septum: 0.9 cm.
   - Preserved left ventricular systolic function.
   - Estimated Left Ventricular Ejection Fraction (LVEF): 62% (Normal).

2. Valvular Structure & Hemodynamics:
   - Mitral Valve: Structurally normal leaflets. Trivial regurgitation.
   - Aortic Valve: Trileaflet, opens well without stenosis. Peak velocity 1.2 m/s.
   - Tricuspid Valve: Normal structure, physiological regurgitation. PASP: 22 mmHg.

3. Pericardium & Great Vessels:
   - No pericardial effusion identified.
   - Ascending aorta normal caliber (3.0 cm). Inferior vena cava collapsibility >50%.

IMPRESSION:
1. Normal biventricular size and systolic performance (LVEF 62%).
2. No significant valvular pathology. No evidence of pulmonary hypertension.

ATTENDING CARDIOLOGIST: Dr. Marcus Vance, MD, FACC (License #CARD-88312)
